

CORDILLERA

de los Andes®

VIGNO Carignan 2019

MAULE VALLEY

TYPE OF WINE: Red wine

D.O.: Maule Valley

VARIETIES: 100% Carignan

DATE GRAPES PICKED: March 30 to April 15

NUMBER OF BOTTLES PRODUCED: 25.400

TASTING NOTES

Opaque, intense ruby red color. Floral and fruit aromas with toasty oak-imparted undertones. The palate is big and unfolds beautifully. Here the notes perceived on the nose are complemented by hints of bay leaf and mint.

SERVING SUGGESTION

Ideal with patés, duck confit, rice with meat or vegetables, delicatessen, roast or barbecued beef, ragouts and beans stews. Serve at 18°C.

TECHNICAL DATA

Alcohol content: 14% ABV

pH: 3,17

Total acidity: 6,5 g/L (expressed in tartaric acid)

Residual sugar: 1,7 g/L

Allergy advice: Contains sulfites.

Properly stored, the wine will hold its potential for the next: 10 to 20 years

FORMATS AVAILABLE: 75 cl

VINIFICATION

Length of maceration: 13 days

Type of fermentation: Alcoholic fermentation in stainless steel tanks.

Malolactic fermentation 100% in oak barrels french.

Length of fermentation: 8 days

Fermentation temperature: 24°C

Ageing: In French oak barrels for 14 months. 7% barrel new, 30% second-use barrels, 63% stainless steel.

Bottling Date: April 2022

AWARDS AND SCORES

2018 vintage : 94 pts - Descorchados 2022 (CHILE)

92 pts - Tim Atkin (UK)

90 pts - Vinous Media (ARGENTINA)

2017 vintage : 92 pts - James Suckling

93 pts - Descorchados 2021 (CHILE)

92 pts - Tim Atkin (UK)

93 pts - Vinous Media (ARGENTINA)

93 pts - Wine Advocate (USA)

2016 vintage : 92 pts- James Suckling (USA)

2015 vintage : 92 pts- Tim Atkin (USA)

92 pts- Wine Advocate Robert Parker (USA)

VIGNO Carignan 2019

MAULE VALLEY

2019 VINTAGE

The 2018-2019 season was quite benign except for the continuation of the mega-drought that Chile has been suffering for the last few years. Particularly in the southern zone, spring frosts were recorded that decreased production and delayed the phenological stages of the plants. Well into summer, we had temperatures well above normal towards the end of January and throughout February, forcing the harvest date to be brought forward to keep the acidity of the grapes vibrant. Rainfed vineyards were particularly stressed due to these temperatures and the lack of water in the soil.

Precipitation June 2018-May 2019: 335 mm

HISTORY

Historical records show that Carignan was brought to Chile between 1928 and 1947 to complement wines made from the País variety. For decades, it languished in blends of bulk wine until the 1980s, when Miguel Torres, with its recently introduced stainless steel tanks, set out to revive the variety. And so, in 1996, Miguel Torres unveiled its first Carignan under the Cordillera label, marking the first chapter in the history of one of our most renowned wines.

Producers working with the variety quickly realized the undeniable quality of Carignan wines, inspiring them to join forces in 2009 to establish Chile's first appellation wine. In 2010, the producers—including Miguel Torres—signed their first declaration of shared commitments, and VIGNO began taking shape. The goal of VIGNO is to better position the Maule Valley by setting it apart through the development and production of character-driven wines that originate from old vines grown in dryland conditions.

VINEYARDS

At this time, our Vigno originates from two vineyards: San José in Melozal, and the Huerta de Maule vineyard, located in the eponymous sector of the Maule Valley.

HUERTA DE MAULE VINEYARD

Location:	Huerta de Maule sector, Loncomilla Valley, Maule Valley
Coordinates:	35°39'58"S 71°58'49" O
Elevation:	160 meters above sea level
Distance from the coast:	56 kilometers
Surface area:	7.44 ha
Planting year:	2009, grafted onto País vines from 1930
Planting density:	2.2 m x 1.2 m, equal to 3,272 plants per hectare
Training system:	Gobelet (free-standing)
Production:	1.5 to 2 kilos per plant

Soil: Both vineyards have granite-derived soils with a transition from gravel to red clay. Their pH is acidic. The upper layers have a sandy loam texture, which then gives way to clay at a depth of approximately 70 cm down to 180 cm. These are deep soils with proper drainage. The undulating topography is marked by significant levels of erosion and different degrees of exposure. These low-fertility soils are perfect for Carignan, which has a natural tendency towards high vigor.

Climate Conditions: A warm Mediterranean climate with clearly defined seasons. Precipitation of around 400 to 600 mm, usually concentrated in the winter months. This rainfall is crucial for these dryland vineyards, because it determines the entire year's crop production. The nights are cold, providing the temperature variation that this variety needs to reach optimal ripeness.
